

ISS's YachtInfo Expands in 2018

The hard-working ISS Education Committee is off to an exciting start in 2018, expanding our events globally.

Focused as always on education relevant to our members, new initiatives in cooperation with other industry organisations will find YachtInfo happening this year across more venues around the world.

In 2017, YachtInfo successes at Monaco and FLIBS featured a popular new format: single subject seminar followed by a networking reception, aboard a yacht, with panels including yacht crew, captains and owners.

Created and led by ISS VP Captain Glen Allen, ISS Education Committee and the fabulous Fleet Miami team, supported by sponsors Bluewater, Royal Huisman and Informa, the next editions of YachtInfo in the USA will be held during the upcoming 2018 Miami and Palm Beach shows, including member cocktail networking, a hospitality lounge, and show tours by water hosted aboard yacht Usher.

Additionally, plans are underway for more European YachtInfo events throughout 2018 in combination with pop-up events run by Viking Recruitment in locations including Palma, Bremen, Viareggio and Antibes.

Farther afield, a sequel to previous successful ISS events in Singapore is being organised, and discussions are being led by Education Committee Chair, Bransom Bean with potential organisers and sponsors for brand new events in Australia and Brazil.

Finally, ISS Ambassador Norma Trease has opened doors to resume collaboration with the PYA and other organisations who share the same drive to keep education at the forefront. Watch this space for more updates.
