

Superyacht Business Principles

All major industries recognise accepted Principles in which to develop Practices. Businesses and Organizations, especially those working in an international environment, position themselves well for continued economic growth when the industry they serve has globally accepted Principals supported by agreed upon Practices.

The superyacht business has continued to grow, develop and evolve over the course of the last four decades; developing into a multi-billion dollar, multi-cultural, and internationally connected industry. Adopting these Principles of good business is a necessary next step to support the growth of our industry.

The opportunity exists for the superyacht industry to join other major international industries as a force for the advancement in global trade and ensuring that the regulations and rules impacting it are relevant, measured and economically viable.
